Bijagós Islands

Promoting access to education on the **Bijagós Islands.**

The **Bijagós Project**

Taking the strategies of Integrated Project Delivery (IPD), the CCA team aims to design a framework for the pre-production phase of the Bijagós Project, which brings schools to the remote islands off of the coast of Guinea-Bissau. Spearheaded by the Orebok Foundation, an international NGO, we hope to nurture a collaboration between CCA, non-profit organizations including Orebok, local teams in Guinea-Bissau and the population of the Bijagós Islands. With the integration of all parties and the supportive public, we hope to successfully bring schools to the islands with cultural consciousness, sustainability, and innovation at the forefront of design.
