

Orebok

Fundação Para o Desenvolvimento Sustentável e Conservação da Biodiversidade dos Bijagós

The OREBOK Foundation is a non-governmental organization, NGO, and [civil society representative](#), striving to contribute to the Sustainable Development of the Bijagos archipelago, accommodate the specific social and cultural links with Biodiversity Conservation and sustainably use natural resources.

Accordingly, the OREBOK Foundation [will intervene in defense of the rights and interests of the people of the Bijagos archipelago](#), including through the elaboration of proposals, reports, manifestos and press releases.

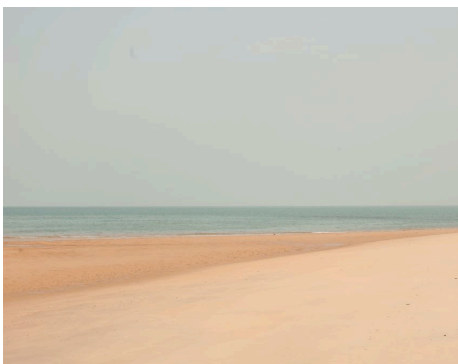

The OREBOK Foundation will participate in the process of public discussions, instruments of territorial planning, studies of environmental impact or legislative proposals, and by organizing and participating in events on different themes of environmental and cultural nature such as conferences, seminars, debates, workshops, festivals and group meetings.

Through intervention, the OREBOK Foundation intends to exercise [the right of public participation in decision-making](#), monitoring and influencing, for this purpose, the development of public environmental policies in Guinea-Bissau and its repercussions on the Bijagos archipelago.

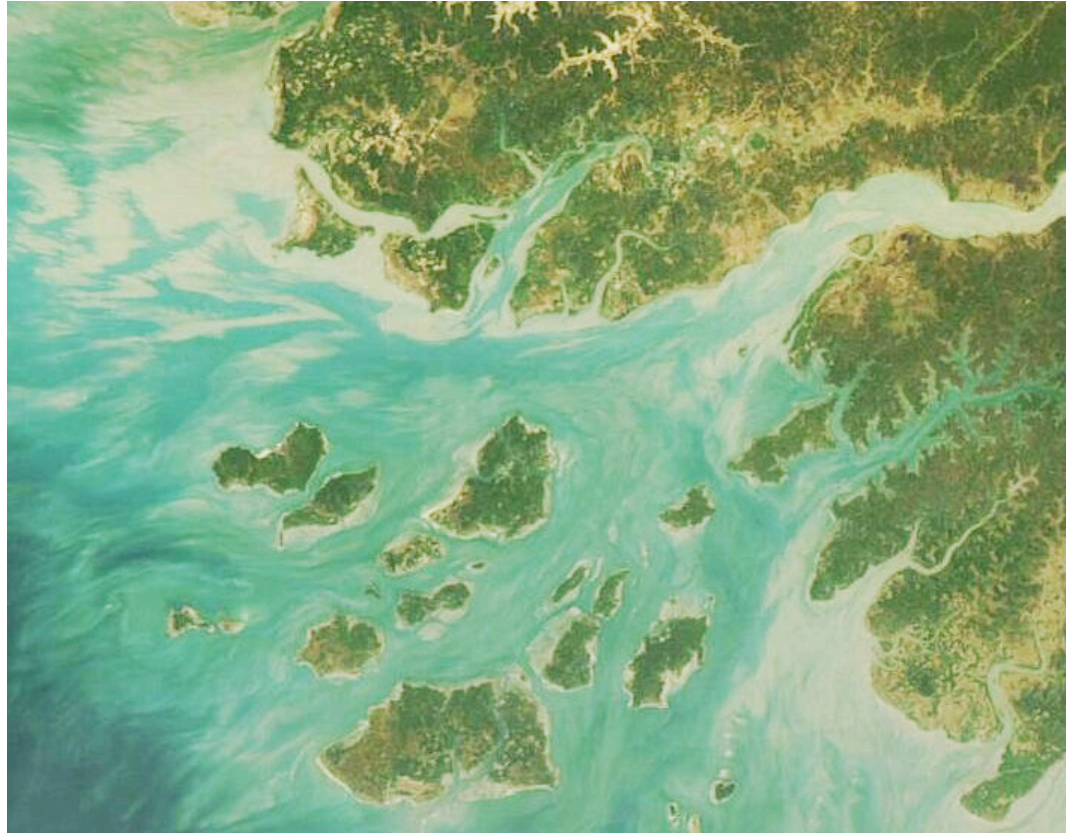

Based in Bubaque in the Bijagos Archipelago, The Foundation's main objectives are to contribute for the conservation of the archipelago's Natural and Cultural Heritage, species and eco-systems diversity, and to promote the Sustainable Development of the Bijagos.

The OREBOK Foundation seeks to work with a different society players including national and international NGOs, farmers, local authorities and communities, researchers and technicians, under a regional, national and international scope. In establishing those partnerships, the OREBOK Foundation seeks ways of civic participated interventions.

OREBOK

Fundação Para o Desenvolvimento Sustentável e Conservação da Biodiversidade dos Bijagós

The OREBOK Foundation is working closely with a student group from California College of the Arts, the Bijagos Project, in San Francisco to develop Integrated Project Delivery Methods to manage OREBOK's recent projects.

The OREBOK's current initiative to bring low-cost, high-efficiency classroom units to the remote islands of the Bijagos is underway.
